The requirements of the 2nd and 5th tasks:

2. (25 pts) Write a shell script that takes a filename as parameter. Then your program will create a story copying one line from each one of the files named giris.txt, gelisme.txt, sonuc.txt randomly in that order and print them to the file whose name is the argument given to the program. If the file exists, ask user if she wants the file to be overwritten. The aforementioned files are given to you with the project description file.

Ex:
```
$ ./myprog2.sh story1.txt
story1.txt exists. Do you want it to be modified? (y/n): y
A random story is created and stored in story1.txt.
$ cat story1.txt
Yardimsever bir arkadasimla bir gun kirlarda gezerken kozasindan
      cikmaya calisan bir kelebek gorduk.

Bu ulkede kral ve kralice halka hizmet eder, cok sevilirmis. Bu ulkede
bir de Prens ve Nilufer Prenses varmis.

Deyimlerimizin ortaya cikis hikayelerini bilmek dilimizin kulture
yansiyan yuzune renk katarak dusunce ve olaylari karsilastirmamizda
etkilidir.
```

5. (25 pts) Write a shell script that takes a wildcard as an argument and a pathname to a directory as an optional argument. If the user supplies only wildcard as an argument, then the program will ask user to delete every file whose name obeys the wildcard under current directory. If the user supplies both wildcard and pathname, then the program will ask user to delete every file whose name obeys the wildcard under the given directory and all of its subdirectories.

Ex:
```
$ ls -l
total 2328
-rwx------ 1 std std 152144 Jun 20 2005 alice-in-wonderland.txt
-rw------- 1 std std 82140 Jun 20 2005 barleby-scrivener.txt
-rw------- 1 std std 13421 Jun 20 2005 calaveras-county.txt
-r---w---- 1 std std 13107 Jun 20 2005 cask-of-amontillado.txt
-rw------- 1 std std 635 Jun 20 2005 french.txt
-rw------- 1 std std 496769 Jun 20 2005 hawthorne.txt
-rw------- 1 std std 172541 Jun 20 2005 looking-glass.txt
drwx------ 14 std std 476 May 25 2007 shakespeare
-r-------- 1 std std 192710 Jun 20 2005 song-of-hiawatha.txt
-rw------- 1 std std 35238 Jun 20 2005 trees-and-other-poems.txt
$ ls -l shakespeare
-rw------- 1 std std 13678 Jun 20 2005 shakespeare.txt
$ myprogr5.sh s*
Do you want to delete song-of-hiawatha.txt? (y/n): y
1 file deleted
$ myprogr5.sh s* .
Do you want to delete shakespeare/shakespeare.txt? (y/n): y
1 file deleted
```
